

学术报告

How deep and hot is a diamond?

报告专家: **Prof. Paolo NIMIS**

University of Padova, Italy

报告时间: **4月11日(周三)上午10:30**

报告地点: **综合楼702会议室**

Professor Paolo NIMIS is the expert of Mineralogy and Metallogeny. He has a wide range of interest in research, including: 1) Crystal-chemistry of pyroxenes and relations between crystal-chemical properties and formation conditions; 2) Thermobarometry of mafic and ultramafic rocks and diamond inclusions, geochemistry of mantle rocks, and their relationships with the diamond-potential of kimberlites; 3) Mafic-ultramafic-hosted VMS deposits, their geodynamic setting and comparison with present-day seafloor mineralizations; 4) Alpine copper metallogenesis and provenancing. He has published more than 80 SCI papers.
